**DETAILED ACTION**

1. This office action is responsive to communication filed on May 25, 2010.

**EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Catherine M. Voisinnet (Reg. 52,327) on May 27, 2010.

The claims are amended as follows:

**Claim 4, page 3**

at line 4 delete "devices;" and insert --device;--

3. The following is an examiner's statement of reasons for allowance:
4. Consider claim 4, the prior art of record does not teach nor reasonably suggest, as a whole, an image sending and receiving system, comprising an image sending apparatus which comprises an image capturing device which captures an image, a recording device which records the captured image on a recording medium, an image selecting device which selects a desired image of images recorded on the recording medium, a first communication device which has a first communication mode for

sending an image capturing command to an external device and sending the image selected by the image selecting device to the external device and a second communication mode for enabling the image sending apparatus to function as an external recording device for the external device and to be read and written by the external devices, a transfer instruction device which outputs a transfer instruction for transferring the image selected by the image selecting device to the external device through the first communication device, and an automatic mode switching device which automatically switches between the first communication mode and the second communication mode in the first communication device upon receipt of an order from the external device, and the external device includes an image receiving apparatus which comprises a second communication device which performs at least communication in the first communication mode with the image sending apparatus, a recording device which records the image received through the second communication device, and a mode switch control device which orders the image sending apparatus to control a switch between the first communication mode and the second communication mode of the image sending apparatus, wherein on checking that there has been the transfer instruction of the image from the transfer instruction device of the image sending apparatus, the mode switch control device of the image receiving apparatus determines whether or not the communication mode with the image sending apparatus is the first communication mode, and sends a conversion command ordering change to the first communication mode if determined that a current communication mode of the image sending apparatus is not the first communication mode, and on receiving the

conversion command from the image receiving apparatus, the automatic mode switching device of the image sending apparatus switches the communication mode of the first communication device to the first communication mode, wherein the first communication mode is a PTP mode, and the second communication mode is a mass storage mode, as recited in claim 4.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
